

Angelo V. Letizia, Associate AIA

Angelo is a Designer and Draftsperson who has over four years of experience in the architectural design field and three years at Sullivan Architecture. Angelo's day-to-day involvement includes preliminary design, schematic design, design development, construction document preparation, assistance with bidding procedures, and construction administration. His technical experience involves drafting, 3-dimensional computer modeling, rendering, graphic design, and a daily interaction with a variety of architectural-based computer programs.

Angelo's experience involves a broad range of project types and sizes. These include, a proposed age-targeted residential community comprised of 68 units in New Castle, NY, a private residence in Armonk, New York, a proposed luxury hotel and cottages in Bedford, New York, and a complete renovation of an existing high-rise hotel located in White Plains, NY, into a residential building comprised of 212 units ranging from studios to two-bedroom penthouse apartments.
